

Breather plug inner valve version made of aluminium alloy

BODY MATERIAL Aluminium alloy**(1) PROTECTION CAP** White Zinc-plated Steel**(2) SPRING** Stainless steel**(3) SEAL** NBR**SET PRESSURE** ~ 0,25 bar**RANGE TEMPERATURE** -10 +80 [°C] ; +14 +194 [F]**DESCRIPTION**

The breather plug is designed to maintain safe, equalized pressure in a unit even when it is under sudden changes in ambient temperature. This model has a valve inside. This system allows the expulsion of the exceeding air in the reservoir, thus re-establishing the pressure setting of the breather. In off-road application it decreases the risk of oil leakage from the unit. The cap protects from foreign bodies which may enter into the mechanical equipment and may cause damages.
