

36N.H

Magnetic drain plug with neodymium magnet and FKM OR for high temperature applications

BODY MATERIAL Lanthane zinc-plated Steel

(1) OR OR FLAT PACKING RING FKM

(2) PERMANENT MAGNET

RANGE TEMPERATURE -10 +120 [°C] ; +14 +248 [F]

DESCRIPTION

Magnetic drain plug with hexagon socket and OR, made of zinc plated steel. New version for high temperature applications with viton OR and special magnet. In this model the magnet is completely embedded in the body plug. The permanent magnet attracts and holds abrasive, ferrous metal particles preventing their circulation through the lubrication or hydraulic system. The magnetic "filter" plug is recommended for gearboxes and in any application with gears in bath of oil.
